EXPERIENCE

Mobile App Developer (SDE-1)

June 2024 – Present

Gatoes – Food and Grocery [Link](#)

Chandigarh, India

- Built and deployed **cross-platform mobile application** using **React Native with Expo** for iOS and Android, converting **Figma designs** into **pixel-perfect, responsive UI** following **UI/UX best practices**
- Integrated **Razorpay payment gateway** with secure transaction handling and implemented **Zoho in-app customer support chat** for enhanced user experience
- Developed **real-time order tracking** with **push notifications** using **socket.io**, ensuring seamless experience across both iOS and Android platforms
- Owned end-to-end development of the **user module** independently, managing complete feature lifecycle from design to deployment
- Integrated multiple **third-party APIs and backend services**, implementing offline-first architecture with **TanStack Query** for data synchronization
- Optimized mobile app performance achieving **80% reduction in API response times** through strategic caching and lazy loading
- Delivered regular updates and maintained the app post-launch, fixing bugs and adding features based on user feedback

Fullstack Developer Intern

Nov 2022 – Mar 2023

HITGOC [Link](#)

Remote

- Engineered full-stack features for an EdTech client ([Careerfly](#)), developing **RESTful APIs** with **Node.js** and designing **MongoDB** schemas to manage course and user data
- Built a dynamic and responsive student dashboard using **React.js (v18)**, implementing **React Hooks and functional components** with **Chart.js** for data visualization
- Integrated **RESTful APIs using Axios** for asynchronous data fetching and implemented **Context API** for state management across the application
- Led the development of a corporate website ([NOC Tech](#)), building a scalable UI with **React.js and Tailwind CSS**, and implementing form validation with proper error handling
- Optimized performance using **code splitting, lazy loading, and Webpack bundling**, achieving **90+ Lighthouse scores** and **40% reduction in load times**

EDUCATION

Bachelor of Technology, Mathematics and Computing Engineering

Dec 2020 - May 2024

Delhi Technological University (formerly DCE)

GPA: 8.44

PROJECTS

City Industrial Traders

[Link](#)

- Engineered a **responsive product listing platform** for a B2B client, developing a **RESTful API** with **Node.js** and designing a **MongoDB schema** to manage complex product catalog
- Built the **frontend using React.js with functional components and React Hooks**, implementing **multicriteria filtering, search functionality, and dynamic pagination**
- Integrated **RESTful APIs using Axios** with error handling and loading states, managing application state with **Context API**
- Created **mobile-responsive UI** with **Tailwind CSS** and implemented **SEO optimization**, resulting in **35% increase in organic reach** and **30% reduction in manual inquiries**

EMARA: Urbanism & Architecture

[Link](#)

- Developed a **dynamic portfolio website** using **React.js with React Hooks**, integrating **GraphQL API** from **GraphCMS** using **Axios** for content management of 12+ architectural projects
- Built **15 responsive pages** with **reusable React components**, implementing **React Router** for navigation and **Context API** for global state management
- Created interactive **UI components** including image carousels, lightboxes, and dynamic content rendering with optimized **component lifecycle** and performance
- Styled with **Tailwind CSS** following modern UI/UX best practices and responsive design principles, improving user engagement by 25%

SKILLS

Languages	JavaScript (ES6+), TypeScript, C/C++, Python
Frontend	React.js, React Hooks, Context API, React Native, HTML, CSS, Tailwind CSS
State Management	TanStack Query, Context API, React Hook Form
APIs & Integration	RESTful APIs, GraphQL, Axios, Socket.io, Third-party APIs
Tools & Build	Git, GitHub, Webpack, Babel, npm/yarn, Docker
Testing	Jest, React Testing Library (Basic)
Backend	Node.js, Express.js, MongoDB, SQL
DevOps	CI/CD pipelines, AWS, Docker, App Store Connect, Google Play Console

ACHIEVEMENTS & LEADERSHIP

- Deployed and maintained **3+ production React.js applications** with proven performance optimization and user satisfaction
- Successfully deployed production mobile app serving 500+ daily active users with 3.5+ ratings across app stores
- 4th place in HackJNU 3.0 (Healthcare category) - Developed mobile health tracking app prototype
- AIR 206 in JEE Mains B.Arch. (Among 1.5 lakh candidates)
- Contributed to open-source React components and maintained technical documentation for team knowledge sharing
